Spire Norwich Hospital, Old Watton Road, Norwich, Norfolk NR4 7TD  
Varrier Jones, Papworth Hospital, Papworth Everard, Cambridge CB23 3RE

Mr Marco Scarci, Consultant Thoracic Surgeon

I run a very busy clinical practice mainly focusing on minimally invasive surgery and chest wall conditions, in particular chest wall conditions after failed pectus deformity repair and trauma. I am familiar with the latest evidence on these conditions and have developed a strong research interest in this field.

I qualified from University G. D'Annunzio in Italy in 2001. Subsequently I have pursued postgraduate training in Malta, UK and Canada.

I am currently a Consultant Thoracic Surgeon at Papworth Hospital in Cambridge and also an Honorary Consultant at Addenbrooke's Hospital, West Suffolk Hospital, Bury St Edmunds and Bedford General Hospital. I am a Senior Clinical Tutor at the University of Cambridge.

Whilst I continue to work as a Consultant Thoracic Surgeon on a full-time basis, there is a short turnaround time for producing reports. I am normally able to see clients within two weeks and prepare a report within a further 4-6 weeks (subject to other commitments/annual leave). The time taken for the report is approximately 4-6 hours work but I can supply an approximate fee once full instruction and medical records for review are received. My hourly rate is £275 per hour.

As well as running my clinical practices, both NHS and private, I have set up and am running a successful group dedicated to treating chest and lung conditions ([www.chestandlung.com](http://www.chestandlung.com)). I also research, have published (and continue to publish) and lecture in the field of single port surgery and chest wall conditions. I have published several chapters on these topics and have two books in print.

I am currently the East of England Representative at the Clinical Reference Group, the national body in charge of advising NHS England about best clinical standards. I am also an advisor to the Regional Medical Director on matters related to thoracic surgery. In addition I am the Chest Wall Lead for the European Society of Thoracic surgeons and a member of the Thoracic Domain of the European Society for Cardiothoracic Surgery. In 2014 I became member of the Perioperative Investigations Workgroup at the National Institute for Clinical Excellence.

I have also founded, and currently run, the Cambridge International VATS Symposium, an annual international course aimed to promote best practice in minimally invasive surgery and teach the latest techniques.

I recently undertook Bond-Solon Expert Witness Training and am currently enrolled into the Cardiff University/ Bond Solon Expert Witness Certificate.

I hold clinical mainly in Cambridge but appointments can be arranged in Norwich.
